# Introduction to Project

Introducing our advanced scholarship portal, distinguished by its dedicated sections for private organization scholarships. Unlike traditional platforms, our innovative application provides a tailored space for private entities to showcase their scholarship offerings. Through this specialized section, students gain access to a diverse array of funding opportunities beyond government programs. Seamlessly integrated with the student's Aadhaar card for streamlined application processes, our portal ensures efficient and user-friendly navigation.

# Objectives/Goals

- **Enhance Accessibility:** Facilitate easier access to scholarships by providing a centralized platform for students to explore various funding opportunities, including those offered by private organizations.
- **Streamline Application Process:** Simplify the scholarship application process by leveraging Aadhar card integration, reducing paperwork and administrative burden on students.
- **Expand Scholarship Options:** Increase the range of available scholarships by partnering with private organizations, thereby offering students a broader spectrum of financial aid opportunities.
- **Ensure Credibility:** Establish seamless integration with the Income Tax Department for verification purposes, ensuring the authenticity and reliability of scholarship offerings and recipients.

# Limitations of existing system

- The existing system doesn't have any provision for private scholarships.
- Submission of Documents to various stakeholders multiple times.
- Organizations are unable to reach out deserving candidates.
- Students are ineligible to apply for more than one scholarship at a time.
